

SCHEDULE OF DETAILED COMMENTS & RESPONSES

- Letters of comment longer than one paragraph (mostly from authorities and institutions) are listed separately from the short verbal comments and the comments response forms (see list below).
- Certain authorities and organisations submitted detailed generic letters or letters containing substantial generic content. While the content of these have been noted, they will not be responded to in the same detail as letters commenting specifically on the Augrabies PV project.
- **Mapping error:** A number of comments relate to a mapping error in the boundary demarcation of Augrabies National Park, which incorrectly includes the site in the Park. This incorrect boundary demarcation has found its way into numerous other mapping databases, resulting in uninformed comment. All of the parties concerned have now accepted this mapping was in error, but the comments were submitted before they became aware of the fact.
- Separate meetings for were held with the two landowners at their request to explain the reports and the project locations impacting their land were indicated on site. These meetings were to clarify the project proposals and impacts. They did not submit comment.
- In some cases a substantial response letter to the comment has been included with the comment letter.

E-6 Letters of response and special meeting notes	Response location
E-6-4 Schedule of detailed comments and responses	N/A
E-6-5 Record of meeting with Mr Vivian McPherson	Comments & responses table
